

FUTURE FARMING AQUAPONICS INSTALLATION

These are the basic files to make your own aquaponics system.

REQUIREMENTS

- 8 triplex panels 600×300mm
- 8 meters aquarium tube
- 1 tin of woodglue
- 4 glass jars
- 1 fishbowl*
- 1 aquarium pump

* The fishbowl should have atleast an opening of 70mm in diameter. If you want to use a bigger one you have to change the circle size of piece 6.2.

WHERE CAN I BUY THIS?

Most homedepots have everything you'll need.

HOW MUCH DOES THE MATERIALS COST?

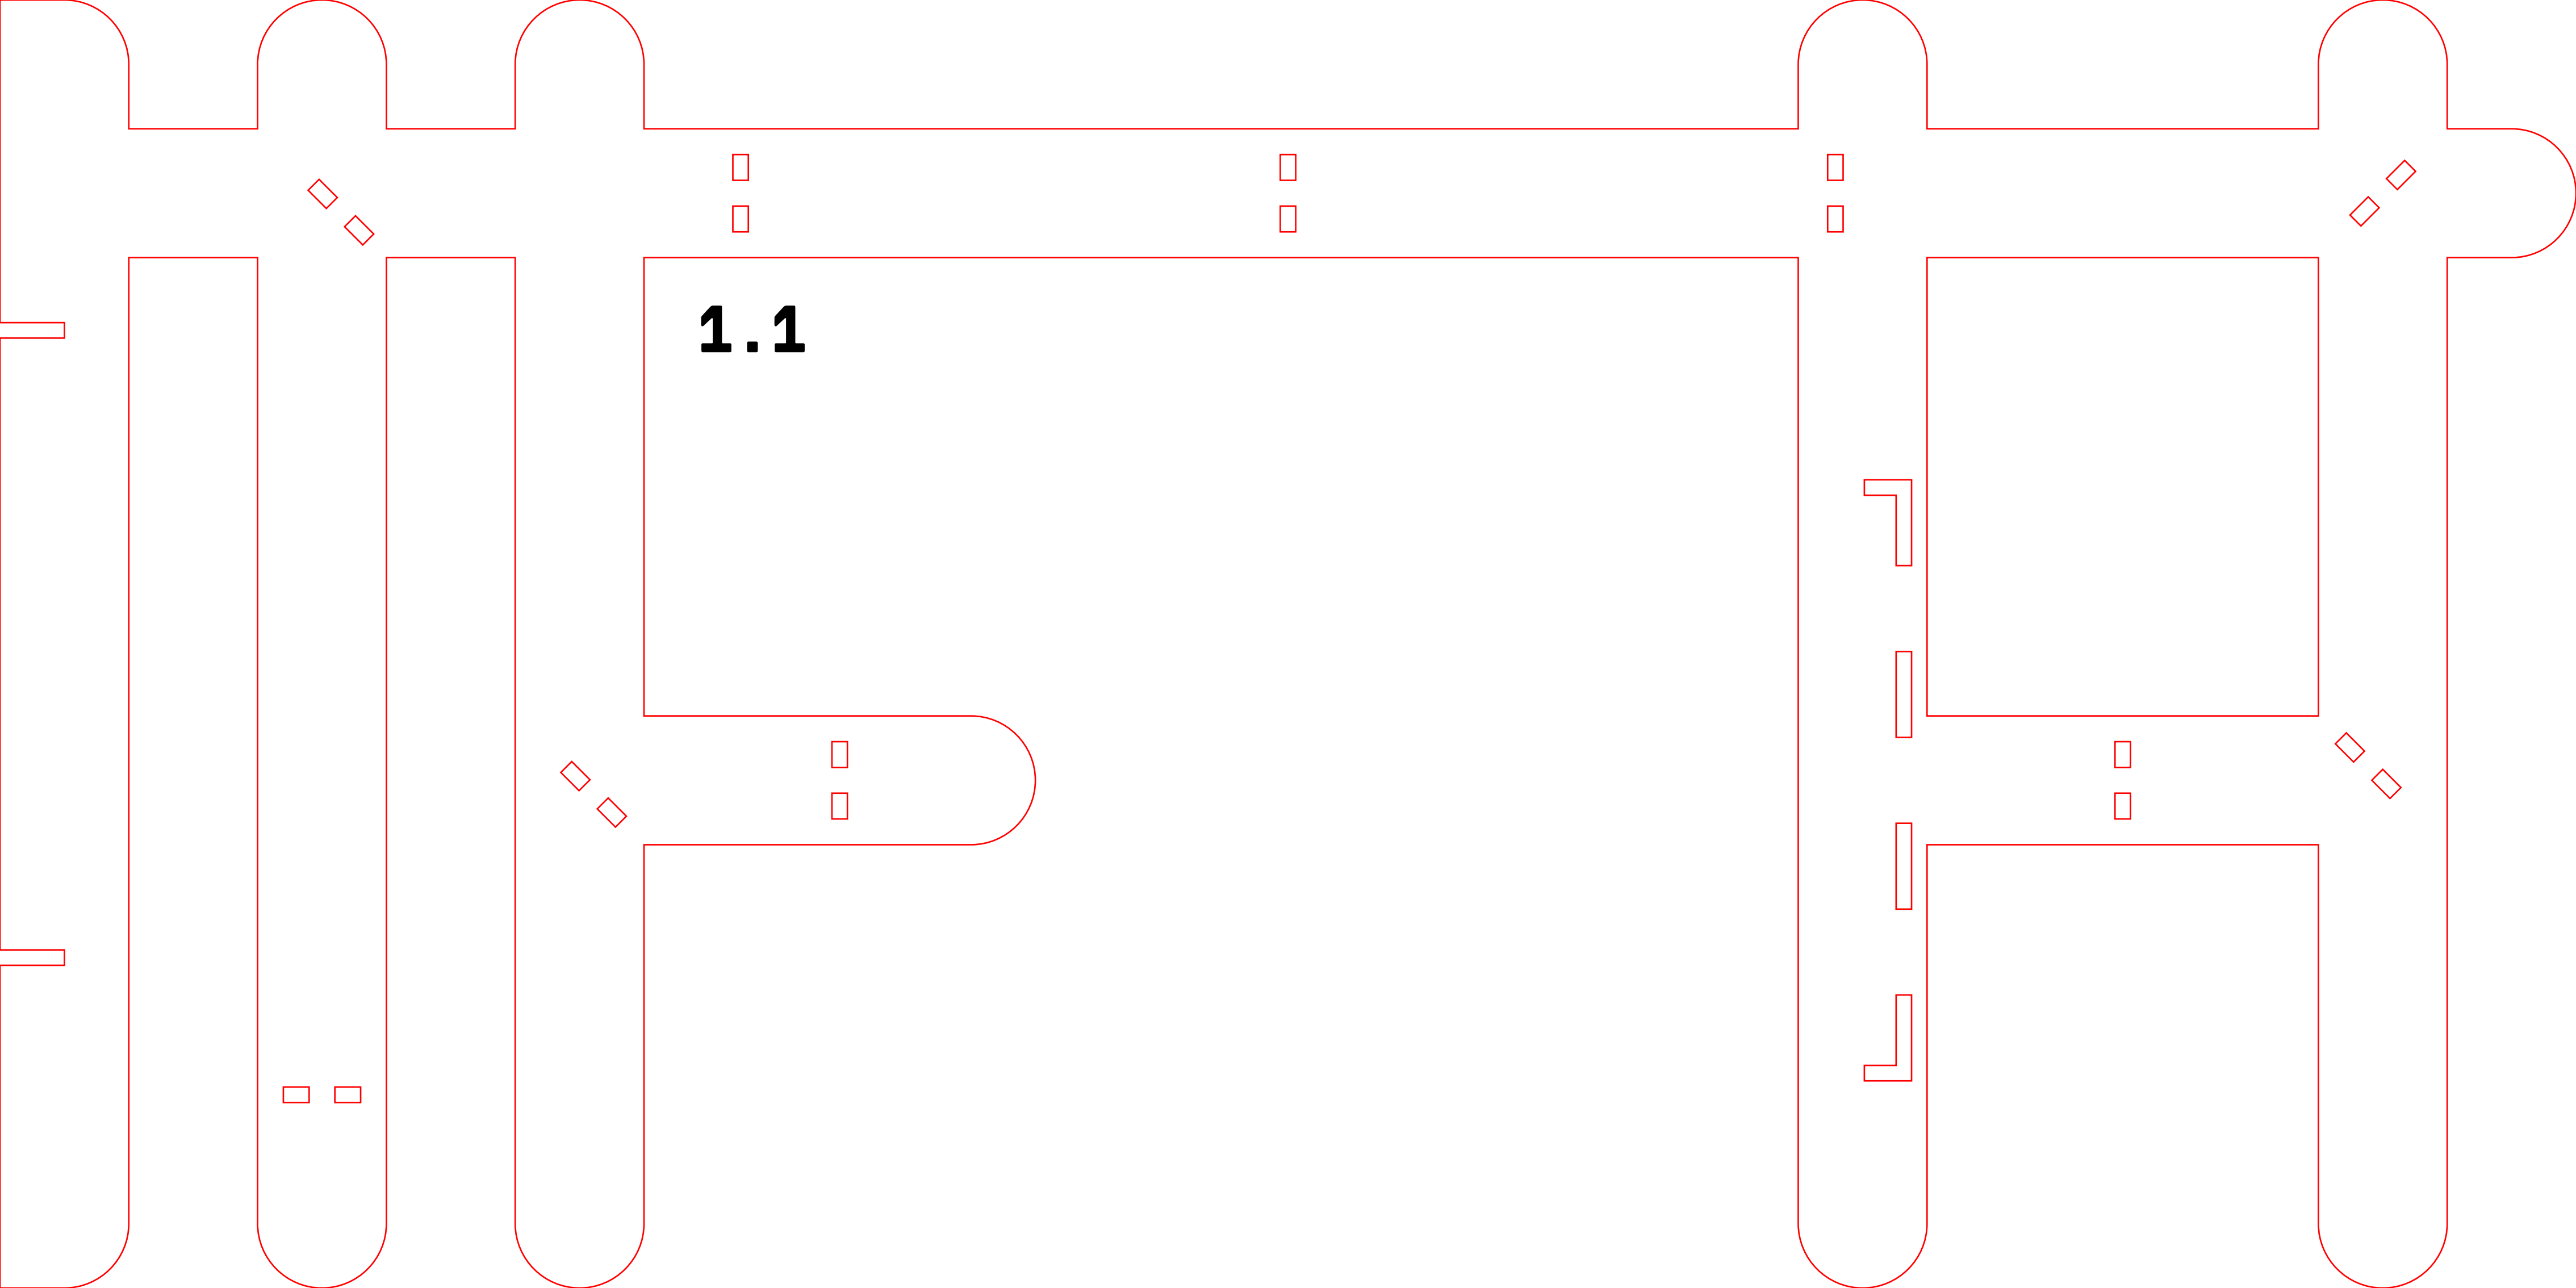

Depents where you buy the materials. But more the less €50,-.

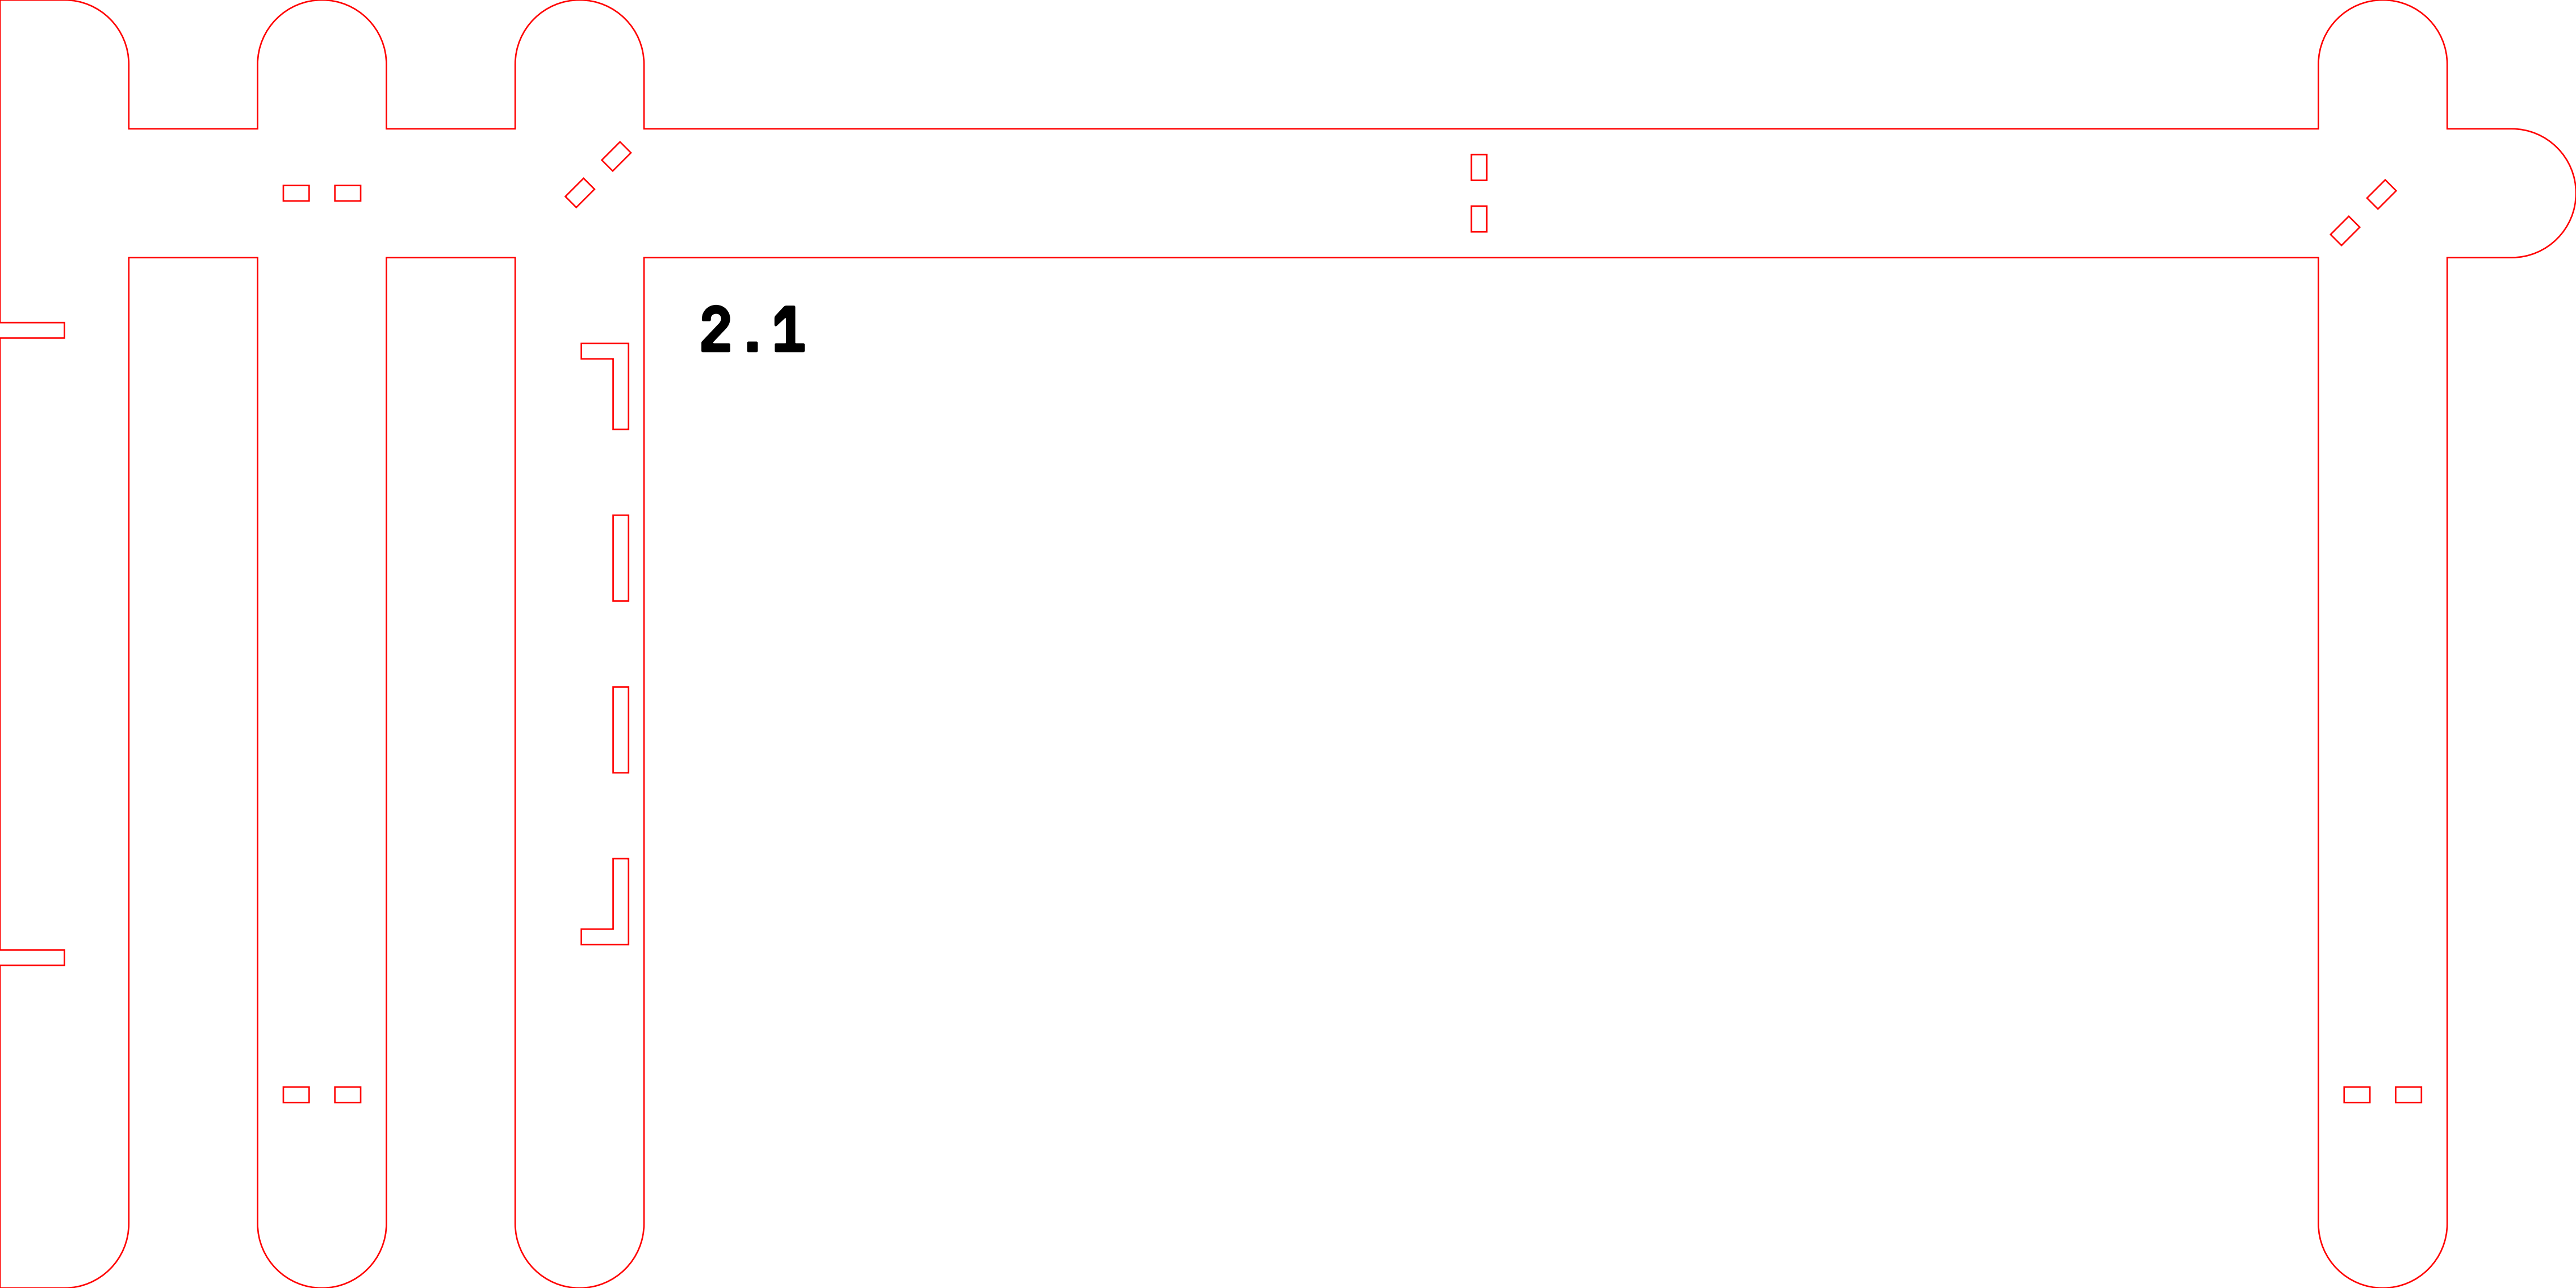

WHERE CAN I LASERCUT THESE FILES?

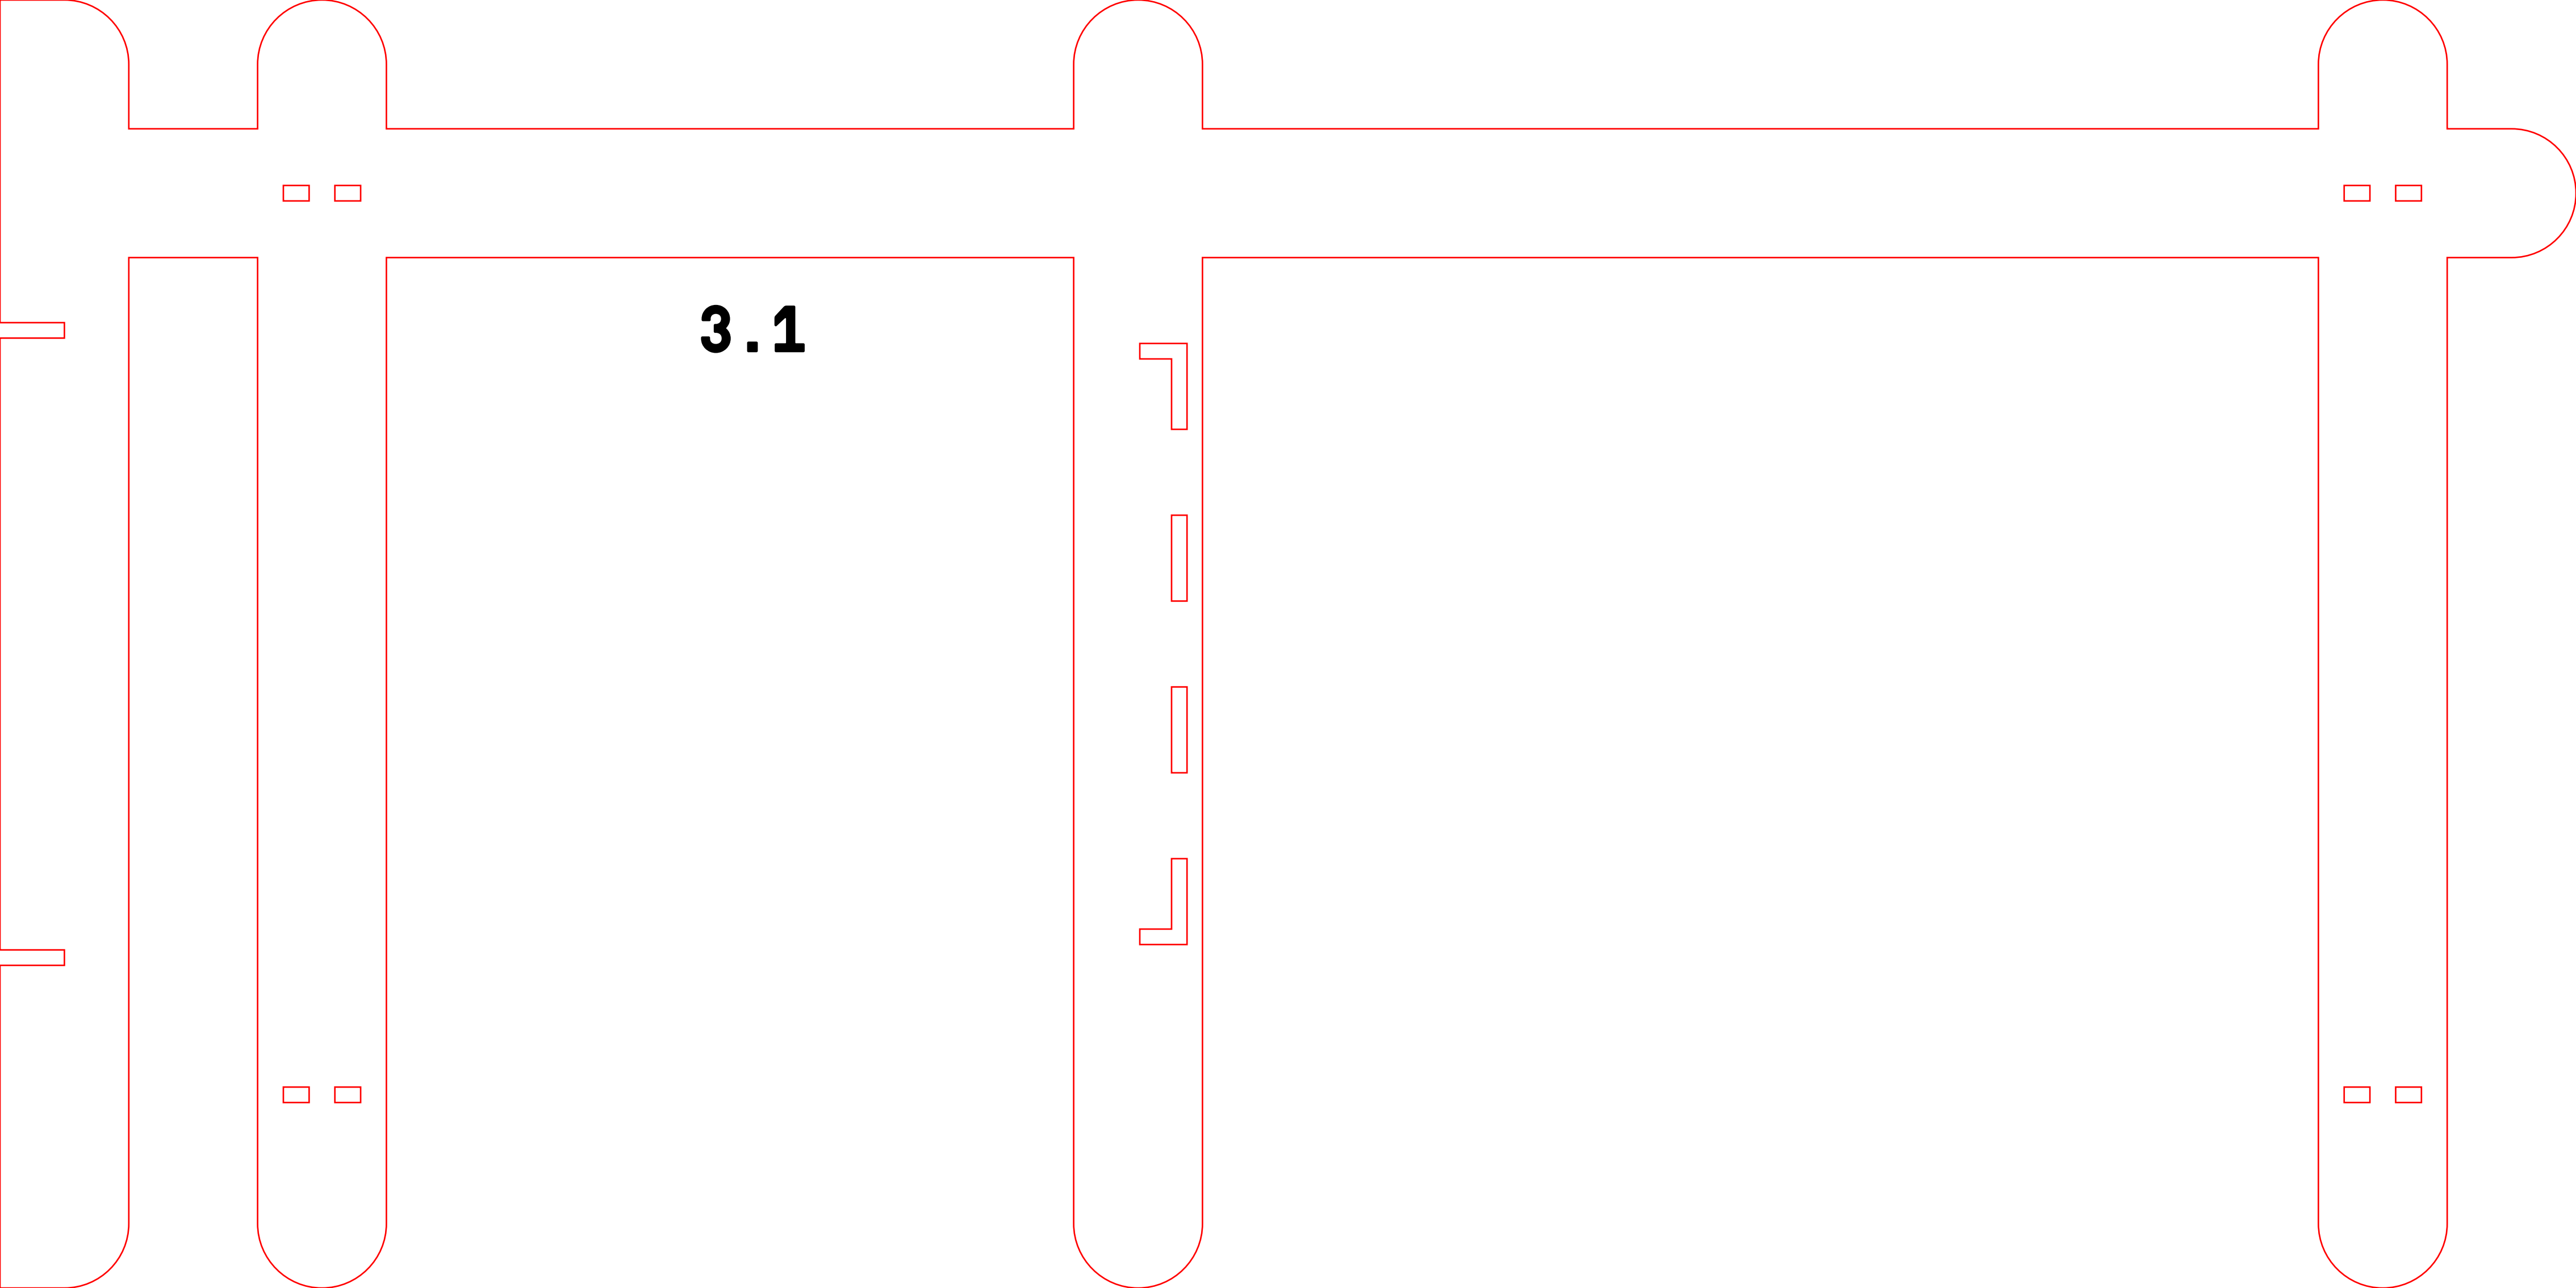

There are many places that own a lasercutter. Check with this link what the nearest place for you.
